

JOB TITLE

Data Analyst

REPORTS TO:

Development Impact Manager

Job Summary

Responsible for managing complex datasets, ensuring accurate and timely data collection, and conducting quantitative analysis to measure InfraCredit's development impact.

BACKGROUND

The Data Analyst will be responsible for managing advanced data management systems and ensuring compliance with reporting standards across different sector-specific metrics.

JOB RESPONSIBILITIES:

The resource person will be responsible for but not be limited to the following:

- 1. Design and manage databases for tracking development impact metrics.
- 2. Use statistical analysis and time-series analysis to interpret data across various sectors such as energy, housing, and transportation.

- 3. Create visual dashboards to simplify reporting and facilitate realtime decision-making.
- 4. Apply machine learning techniques to forecast long-term project outcomes and conduct multi-year impact tracking.
- 5. Ensure all data is third-party verifiable and aligns with frameworks required by development partners (such as KfW, BII, FCDO).

SKILLS:

- First or Master's degree in Data Science, Computer Science, Statistics or a related field.
- 2. Proficiency in data analytics tools and data visualization platforms.
- 3. Expertise in impact evaluation, financial performance analysis, and SDG-related tracking.
- 4. Strong knowledge of database management and experience working with large datasets from multi-sectoral projects.
- 5. 3-5 years' experience working in this role or a similar role.
- 6. Very strong alignment with InfraCredit's core value system Innovation, Passion, Integrity, Collaboration and Impact.
- 7. Professional, enthusiastic attitude, team player.
- 8. Good appreciation and working knowledge of Microsoft Office tools.
