

VACANCY FOR:

ESG SPECIALIST – CLEAN ENERGY

JOB TITLE ESG Specialist – Clean Energy

REPORTS TO: Head ESG

Job Summary

Responsible for the integration of ESG principles into all clean energy projects and alignment with sustainability goals, sector-specific KPIs, and international standards.

BACKGROUND

The ESG Specialist – Clean Energy will be responsible for ESG integration, encompassing renewable energy technologies, carbon emissions reduction and social inclusion outcomes.

JOB RESPONSIBILITIES:

The resource person will be responsible for but not be limited to the following:

1. Implement and manage the ESG strategy for the renewable/clean energy programme, aligning with clearly defined organizational goals, the specific needs of clean energy projects and good international industry practices.

2. Implement, and maintain an ESMS tailored to the specific needs of clean energy projects.
3. Conduct ESG assessments and risk assessments to identify opportunities and challenges.
4. Oversee the integration of sustainability principles and climate adaptation, mitigation, and resilience measures into project design and implementation.
5. Monitor and report on ESG performance metrics and KPIs.

SKILLS:

1. First or Master's degree in Environmental Science, Renewable Energy, or a related field.
2. 3-5 years' experience working in ESG management, renewable energy practices, or related fields, with a focus on the clean/renewable energy sector.
3. In-depth knowledge and understanding of climate adaptation, mitigation, and resilience principles in the renewable/clean energy space.
4. Deep understanding of Environmental and Social Management Systems (ESMS).
5. Very strong alignment with InfraCredit's core value system - Innovation, Passion, Integrity, Collaboration and Impact.
6. Professional, enthusiastic attitude, team player.
7. Good appreciation and working knowledge of Microsoft Office tools.
